Professional Summary

MERN Stack Developer with hands-on production experience building a role-based Learning Management System (LMS) serving admin, instructor, and student roles. Skilled in React.js, Node.js, Express.js, MongoDB, JWT authentication, and REST API development. Experienced in building scalable full-stack applications with clean architecture, reusable components, and responsive UI design. Focused on writing maintainable, performance-oriented code while continuously improving skills in TypeScript, testing, and backend scalability.

Work Experience

MERN Stack Intern

Mar 2026 – Present

CDGAI – Cecos Innovation, Peshawar

- Building a production-level Learning Management System (LMS) with role-based access for admin, instructor, and student workflows.
- Implemented JWT authentication and protected routing for secure access control and user management.
- Developed reusable React components including dashboards, course modules, and admin panels for scalable frontend architecture.
- Built modular REST APIs using Node.js and Express.js for clean frontend-backend integration.
- Collaborated within an Agile team using Git workflows, pull requests, and code reviews to improve development efficiency.

Frontend Developer Intern

Jul 2024 – Sep 2024

Software Synergy Solution, Peshawar

- Developed responsive user interfaces using React.js and modern JavaScript (ES6+).
- Improved UI responsiveness and component rendering performance through optimization techniques.
- Worked in Agile sprint cycles while maintaining clean, maintainable, and scalable frontend code.

Projects

Recipe Sharing Web App (Final Year Project)

🐙 GitHub Live Demo

React.js — Firebase — Tailwind CSS — Material UI

- Built a full-stack recipe sharing platform using Firebase Authentication and Firestore real-time database.
- Implemented category filtering, dynamic UI rendering, and optimized state management for better performance.
- Designed a fully responsive interface using Tailwind CSS and Material UI following modern UI/UX principles.
- Integrated favorites, search functionality, and reusable components to enhance user experience.

MERN Food Delivery App

🐙 GitHub Live Demo

React.js — Node.js — Express.js — MongoDB

- Developed a full-stack food delivery application with authentication, cart management, and order functionality.
- Managed global application state using Redux Toolkit for scalable and predictable data flow.
- Designed REST APIs for efficient communication between frontend and backend services.
- Built responsive layouts optimized for desktop and mobile devices.

Country & Weather Applications

Country App Weather App

React.js — REST APIs — CSS3

- Integrated live REST APIs with real-time search, filtering, and dynamic UI updates.
- Implemented loading states, error handling, and optimized API requests for improved usability.
- Designed responsive and user-friendly interfaces using modern frontend development practices.

Technical Skills

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Database:** MongoDB, Firebase (Firestore, Authentication)
- **Tools & Workflow:** Git, GitHub, Postman, VS Code, npm
- **State Management:** Redux Toolkit, Context API
- **Deployment:** Vercel, Netlify, Render
- **Currently Learning:** TypeScript, Jest Testing, Docker, PostgreSQL

Education

Islamia College University, Peshawar

2021 – 2025

BS Software Engineering — GPA: 3.10 / 4.0

Final Year Project: Recipe Sharing Web App (React.js + Firebase)

Hangu Institute of Science and Technology

FSc Pre-Engineering — 854 / 1100

Certifications

- Web Development — Saylani Welfare Trust
- Freelancing — DigiSkills
- Graphic Designing
