Professional Summary

MERN Stack Developer with a BS in Software Engineering, currently developing a production-level Learning Management System (LMS). Experienced in building scalable full-stack applications using React.js, Node.js, Express.js, and MongoDB. Skilled in REST APIs, JWT authentication, and responsive UI development. Delivered multiple real-world applications with a strong focus on performance optimization, scalability, and clean, maintainable code.

Work Experience

MERN Stack Intern

Mar 2026 – Present

CDGAI – Cecos Innovation, Peshawar

- Currently developing a full-stack Learning Management System (LMS) with role-based access (admin, instructor, student).
- Implemented secure JWT authentication and protected routes to ensure data security.
- Built reusable React components for dashboards, course modules, and admin panel.
- Developed modular REST APIs using Node.js and Express.js for scalable backend architecture.
- Collaborated in Agile environment using Git, improving development efficiency and code quality.

Frontend Developer Intern

Jul 2024 – Sep 2024

Software Synergy Solution, Peshawar

- Developed responsive user interfaces using React.js and modern JavaScript (ES6+).
- Improved UI performance and responsiveness by 30% through optimization techniques.
- Collaborated with team members in Agile workflow ensuring timely feature delivery.

Projects

Recipe Sharing Web App (FYP)

[GitHub](#) — [Live Demo](#)

- Developed a full-stack application using React.js and Firebase with authentication and real-time database.
- Implemented category filtering and dynamic UI rendering to enhance user experience.
- Designed responsive interface using Material UI and Tailwind CSS for modern UI/UX.
- Optimized application performance and state management for scalability and speed.

MERN Food Delivery App

[GitHub](#) — [Live Demo](#)

- Built full-stack MERN application with authentication, cart system, and order management.
- Managed global state using Redux Toolkit for efficient and predictable data flow.
- Designed REST APIs for seamless communication between frontend and backend.
- Delivered responsive UI ensuring smooth experience across multiple devices.

Country & Weather Applications

[Country App](#) — [Weather App](#)

- Developed API-based applications with real-time data integration and dynamic UI updates.
- Implemented search, filtering, and error handling for improved usability.
- Optimized data fetching and loading states for better performance.
- Built responsive and user-friendly interfaces using modern frontend practices.

Technical Skills

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI
- **Backend:** Node.js, Express.js
- **Database:** MongoDB, Firebase
- **Tools:** REST APIs, JWT Authentication, Redux Toolkit, Git, Postman
- **Deployment:** Vercel, Netlify, Render

Education

Islamia College University, Peshawar

BS Software Engineering 3.10/4.0

Final Year Project: Recipe Sharing Web App

Hangu Institute of Science and Technology

FSc Pre-Engineering 854/1100

Hangu Institute of Science and Technology

Matriculation (Science) 980/1100

Certifications

- Web Development – Saylani Welfare
- Freelancing – DigiSkills
- Graphic Designing
